CertKit: PRINCE2 Foundation (incl. 2017 update)

PRINCE2 is one of the most widely used and accepted nonproprietary methodologies for managing projects, as it can be applied to any project regardless of project scale, organization type, geography, or culture. This path of courses covers the objectives for the PRINCE2 Foundation exam (2009 & 2017 aligned).

Prerequisites:
This is not a general project management course although it provides a sound framework for other techniques. Delegates should bring to the course some experience of participating in projects. Typically, between twelve months is the minimum necessary experience of working on projects.

Course outcome:
- Understand the need for project management and how PRINCE2 meets that requirement
- Understand the PRINCE2 process model
- Prepare project plans using product-based planning techniques and undertake risk analysis and management for the project
- Prepare information for inclusion in a Project Initiation Document
- Understand techniques for the management of product development, quality control and change control.

Who should attend:
All levels of employees or individuals who intend to write the PRINCE2®: Foundation exam and those who wish to acquire the skills necessary to successfully participate in a project management team using the PRINCE2® methodology.

CertKit content:
- E-learning courses:
